

## **The Omega Star**

There's an old myth of an evil alchemist wielding a Klein Star whose power dwarfed all others to destroy entire worlds.

Not much is known of this alchemist, but the Star he wielded is known to all: The Omega Klein Star. Capable of storing massive amounts of matter, and unleashing it at will.

It's unknown how the alchemist was able to make a Klein Star shoot out matter as if it were some kind of Destruction Catalyst or Hyperkinetic Lens, but he did; and its effects were felt in many places.
