

## The IPF

The Intergalactic Prison Complex is owned and operated by the Intergalactic Police Force - known for their cruelty and disregard for the welfare of their captives.

I experienced that firsthand during my stay there, and I am more than happy to have escaped. So many aren't able to...

But, I managed to make it out alive. Now, I must do my best to avoid them for as long as possible.

IPF guards aren't exactly known for being friendly, after all. I have to constantly watch my back for fear of getting surprised by one of them, even on a remote world like this.
